DETAILED ACTION

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.

2. The disclosure is objected to because of the following informalities:

page 11, line 15 "auxiliary piston 14" should be --auxiliary piston 41--,

page 18, line 3 "regenerative braking braking force" should be --regenerative braking force--.

Appropriate correction is required.

Drawings

3. The drawings are objected to because in Fig. 1, applicant fails to show a connection to a "port" just above "43c and 43f" on cylinder 15; and also applicant fails to place "slant lines" on section view of master cylinder piston 18a near coil spring.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief

Art Unit: 3683

description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the output hydraulic pressure value" in lines 17-18. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the output property" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the vehicle deceleration" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the output property" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3683

Claim 5 recites the limitation "the target vehicle deceleration" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the maximum value of regenerative braking force" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the target relation" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the vehicle deceleration" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the regenerative braking force" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "said differential pressure control valve" in lines 5-6. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "said pressure increase control valve" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim.

Claim 2 is indefinite due to its dependency to claim 1.
